

Recently nature struck an ugly blow to the Salina Kansas RC Club. 100 mile an hour winds destroyed their facilities and field. The Salina Club was scheduled to host an IMAC (International Miniature Aerobatic Club) event on June 27th and 28th. This club is actually in our region and after a quick review by the board and a phone call, a decision was made to move the event to Thunderbird Field. Hence the Cowtown IMAC was born! Moving the event to our field now gives all of you the opportunity to try IMAC.

Many of you may be asking what is IMAC? IMAC is a global organization and a competitive discipline on RC flying focused on scale aerobatics. To learn more, go to flyimac.org.

IMAC is divided into 5 classes (Basic to Unlimited) plus a Freestyle class. Basic has some very basic maneuvers and is a very good class for someone to give IMAC a try. If you go to flyimac.org, and then go to 2026 Sequences, you can print off the sequences and score sheets for the class that matches your skill level.

There is NO entry fee for first time IMAC participants. And NO you don't need to have a 40% gas airplane. The overall region winner in Sportsman Class last year, won the class by flying a 67 inch wingspan electric plane. So scale like electric, gas or glow planes will work!

Mo Culverwell is going to be the Contest Director. Mo and I will be practicing over the next two weeks and will be available to help all of you that are interested. If you have any questions please reach out to me or Mo. We look forward to seeing many of you come out, have some fun, enjoy some great fellowship, and try your hand at IMAC.

Please register by going to flyimac.org, then selecting South Central Region, scroll down to Cowtown IMAC and then hit the register link. Remember there is NO cost to first time pilots.

I look forward to seeing many of you participate in the event!

Scott
